AUTOTRACK ASSET TRACKING

Track all your company asset

Introduction

Autotrack Asset tracking is design base on barcode as a core technology to track your entire company asset. Asset tracking make it simple to manage your businesses valuable assets, from software, IT assets, vehicles, tools, medical devices, and more. Instantly locate your assets, eliminate time spent searching for missing items and stop unnecessarily replacing lost assets. Fast local technical support, customization and Getting Started training is included.

Autotrack complete solutions include everything you need to account for the valuable assets used to run your business. Complete solutions come with a mobile computer for managing assets in the field or away from your desk, integrated barcode labeling software and a barcode label printer for creating asset tags, and polyester asset tags. Tracking your organization's assets just got easier. Local technical support and "getting started" training is also included to get you up and running fast.

Feature

Assets can be checked-out to employees and customers with assigned due dates. Management reports are included to help you make the best informed business decisions relating to your assets. Autotrack also features an easy-to-use interface designed to meet the asset tracking needs of small to medium sized businesses, departments within large enterprises, government agencies, educational institutions, and healthcare organizations. Autotrack software is available in 2 editions: Professional or Enterprise.

Why Autotrack?

Spend less time searching for lost, misplaced or checked-out assets

Extend the useful life of your equipment by scheduling routine maintenance

Eliminate unnecessary expenses to replace lost items

Track check-in and check-out to inform business processes

Easily access data on asset cost and depreciation for accounting purposes

Web base online software to be access from any place.

Hardware and OS independent for client.

What to track?

Furniture and operational non-inventory

IT assets like laptops, PDAs and servers

Equipment

Evidence

Tools and vehicles

Files and documents

Hardware

Mobile Computer

Autotrack complete solutions work perfectly either a Honeywell CN50 mobile computer or Datalogic SkorpioX3 mobile terminal. For industrial environments, field operations, or applications requiring repetitive data entry, we

recommend our most popular mobile computer, Datalogic SkorpioX3. Datalogic SkorpioX3 features a ruggedized housing to withstand repeated drops to concrete, is sealed against moisture and dust, and features a full keypad with large touchscreen. For in and out office environments or if a full touchscreen is more your style, we recommend the Honeywell CN50. The Honeywell CN50 combines a large touchscreen with keypad with a durable exterior housing that is more durable than today's consumer smart phones and able to withstand repeated drops to concrete. Use either mobile computer to check assets in or out; perform audits in the field; and move, add, or remove assets.

Asset Tag Printer and Labeling Software

Autotrack complete solutions recommended using Argox R600 or Intermec PM43 300dpi barcode printer, Autotrack label designer software for creating barcodes. The Argox R600 barcode printer is a compact and powerful desktop that can print direct thermal (semi-permanent) and thermal transfer (near permanent) barcode labels. It is our most popular printer and a leader in its class that features USB, serial and parallel connectivity. The Intermec PM43 installs easily and its user-friendly heavy duty design makes it simple to load and easy to operate.

PC System Requirements

32-bit or 64-bit version of:

Windows 8

Windows 7 Professional

Windows Server 2003

Windows Server 2008

750 MHz or faster processor (2 GHz recommended)

1 GB RAM minimum (2 GB recommended)

10 GB of available disk space

1024 x 768 display, 256 colors minimum

USB drive for installation
