ASSET & INVENTORY TRACKING SOFTWARE

TEKLYNX

BACKTRACK® 6

BACKTRACK 6 asset and inventory tracking software gives you the power to track the exact location, movement and usage of any item accurately and efficiently. From File Tracking to Inventory Control to Tool & Equipment Tracking, there are no limits to the number or type of tracking applications that BACKTRACK can handle.

BACKTRACK's Application Templates allow you to get up and running quickly by simply modifying an existing tracking application to meet your needs. BACKTRACK includes over a dozen ready-to-use templates for common tracking applications.

- Archival/Off-Site Storage
- Capital Asset Tracking
- Child ID Program
- Collections
- Court House File Tracking
- Document & File Tracking
- Equipment Tracking
- General Inventory
- Human Resource Files
- IT Asset Management
- Law Office File Tracking
- Libraries
- Tool Tracking

The four Tracking Databases are the key to BACKTRACK's flexible tracking capabilities. With BACKTRACK you can easily transfer or manipulate data via the keyboard or using a mobile device. Import/export of popular data formats allows you to share BACKTRACK data with your existing business applications.

CUSTOMIZABLE DATABASES	# OF RECORDS	DATA TYPES *	# USER-DEFINED FIELDS
User Database	Unlimited	C, N, D, P, L, M	60
Item Database	Unlimited	C, N, D, P, L, M	60
Location Database	Unlimited	C, N, D, P, L, M	60
Transaction Database	Unlimited	C, N, D, P, L, M	10

*C = Character, N = Numeric, D = Date, P = Picture, L = Logical, M = Memo

Backend database support now includes Microsoft SQL Server 2000, SQL Server 2005, SQL Express 2005 and Microsoft Access, in addition to existing support for Microsoft Visual FoxPro.

BACKTRACK's Label Design Capability enables you to build labels unique to a business or application. The Label Designer works with TEKLYNX' LABEL MATRIX®, LABELVIEW™ and CODESOFT® label design software packages.

The powerful Report Designer provides unlimited reporting capabilities. With BACKTRACK's Report Designer, you can create and print custom reports that meet your specific information tracking needs.

With many supported Mobile Devices, BACKTRACK makes remote tracking activities quick and easy. Using mobile devices with BACKTRACK, users can add items, perform physical inventory activities, and capture daily transaction activities no matter where they are.

Windows Mobile Devices - Supported Operating Systems/Processors

- Windows CE .NET 4.1
- Windows CE .NET 4.2
- Windows Mobile 2003
- Windows Mobile 2003 SE
- Windows Mobile 5.0 (with some restrictions)
- Windows Vista
- Any Windows mobile device with an ARM processor, including MIPs, Hitachi SuperH (SH3, SH4) and Intel x86 processors

BACKTRACK gives you the flexibility to handle all of your tracking needs – today and in the future.
