

A TAP WITH AN NFC CARD TO EXPAND YOUR BUSINESS NETWORK

An **NFC Business Card System** allows professionals to share contact information quickly and accurately with a tap on an NFC-enabled device. This ensures details are current and easily accessible, giving users an advantage in professional interactions.

BUSINESS BENEFITS OF USING NFC.

- Immediate Connectivity.
- Wireless Data Transfer.
- Safe, Standardized, and Regulated Technology.
- No Requirement for Network Access.
- Cost-Effective Solutions.
- Lower Carbon Footprint.

How close do you need to be for NFC to function?

(A range of 1 to 4 centimeters)

“How does NFC technology enable rapid networking?”

The card has a small chip that transfers information, like your name, phone number, and website, to the phone, making networking quick and easy.

“How can NFC technology be used to share contact information?”

Facilitate fast and instantly sharing the contact information or business details by just tapping the card against an NFC-enabled smartphone or device.

“Why switch to NFC business cards over traditional paper cards?”

It boosts your professional image by demonstrating that you are tech-savvy and innovative, providing more interactive features such as links to websites or social media profiles.
