- Serial, parallel, LAN and USB combo interface covers all legacy and modern systems requirements. Optional WLAN available.
  - SZPL, SIPL, SDPL, STCL command emulations enable direct replacement of printers in legacy applications.
  - Auto-switching interface setting and media auto-calibration to adjust sensor levels for faster setup time between print jobs.
  - 30+ display languages, 40+ print character sets, and 15 SATO resident fonts, additional user downloadable space provide universal format coverage.
  - All major agency approvals permit global deployment for large enterprises or future expansion potential for growing startups.

- ### Industrial Durability
- Metal casing including front panel and side covers protects against any industrial environment.
  - Die-cast Aluminium frame, print and ribbon mechanism provide solid stability to ensure print quality and printer durability.
  - 1 year global warranty for printer including installed options. Long lasting 30 kilometer guaranteed print head and platen roller.

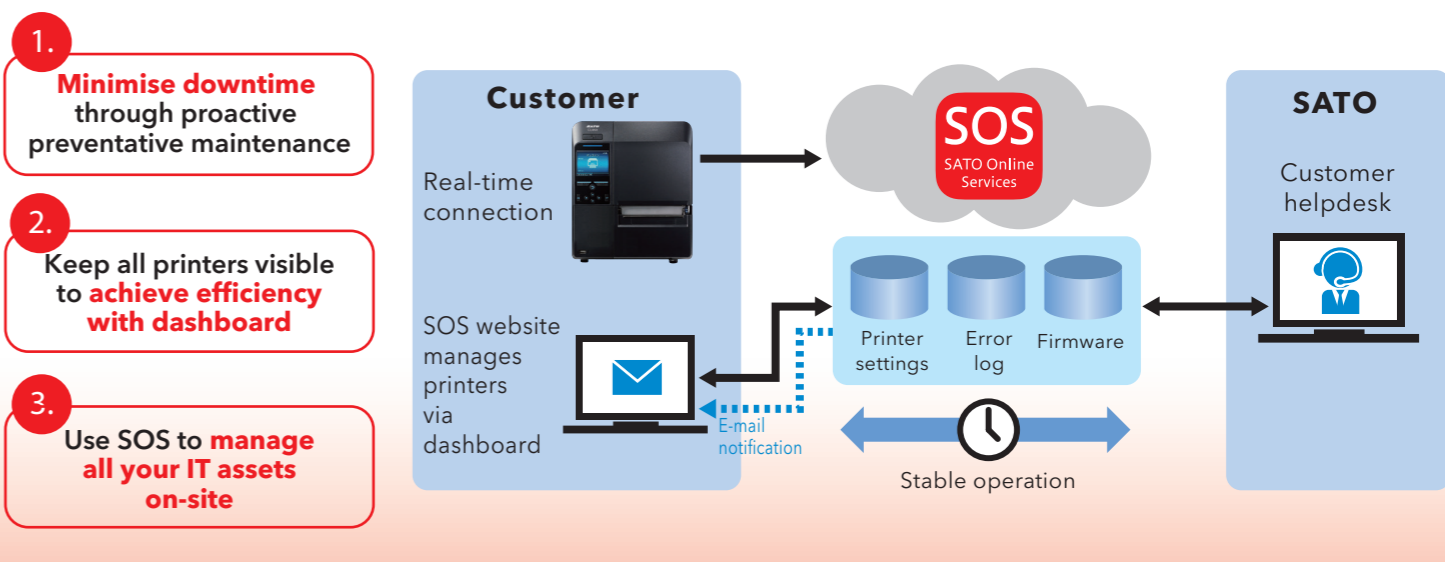

- ### Accurate and Efficient Performance
- Head check function performs print head status analysis before each print to assure printing accuracy.
  - High speed data processing with 10 ips print speed equals faster first label out and print job throughput.
  - 10 preset darkness levels with finite adjustment between presets for optimal print performance setting
  - UHF and HF RFID\* options support a wide variety of tags and include adjustable antenna system for optimal inlay encoding

- ### Sustainable Innovation
- Coreless ribbon uptake simplifies the loading process. Thermal ribbon is now directly attached to ribbon spindle and removed via one-touch release button.
