

Raw Material Receiving

Introduction

Efficiently manage your raw material intake with AGen advanced Receiving Module. Designed to streamline the receiving process, this module ensures accuracy, traceability, and quality control from the moment materials arrive at your warehouse.

Key Features

1. Multiple Receiving Modes

- **Manual Receiving:** Enter data manually for complete control using your mobile phone or PC.
- **Label printing auto receiving:** Automate receiving processes based on label printed.

Raw Material Receiving

2. Traceability

- **Unique Serial Numbers:** Assign and track unique serial numbers for all received materials.
- **Detailed Records:** Maintain comprehensive records of all received goods, including discrepancies and inspection results.

3. Quality Control

- **Incoming Inspection:** Ensure only high-quality materials enter your production line.
- **Defect Recording:** Phot capturing and manage any defects found during the receiving process.

4. Integration

- **Real-Time Updates:** Get real-time updates on AGen raw material levels and receiving status.

Benefits

- **Improved Accuracy:** Reduce errors with automated data entry and real-time updates.
- **Enhanced Traceability:** Track materials from receipt to production, ensuring accountability and quality.
- **Increased Efficiency:** Streamline receiving processes to save time and reduce labor costs.
- **Better Quality Control:** Catch defects early with thorough inspections and detailed records.
